

The background features a stylized globe composed of grey dots, overlaid with white lines forming a network or grid pattern. Below the globe, the words "enterprise europe" are written in a large, white, sans-serif font. The letters are partially obscured by the globe's pattern. A thin horizontal bar at the bottom of the slide is composed of four colored segments: orange, green, dark blue, and light blue.

## Activity Report 2013

This paper provides an overview on the activities and performance of the Business Cooperation Centres of the Enterprise Europe Network in third countries (operating under Article 21.5 of the CIP) based on their activity reports submitted for the period January 2013 – December 2013.

**Period covered: 1st January – 31st December 2013**

## INTRODUCTION

Network partners operating under Article 21.5 of the CIP (Business Cooperation Centres) have submitted their activity reports covering the reporting period 1 January 2013 – 31 December 2013 (12-months). Their 24-months contractual work programme covers the period 1 January 2013 – 31 December 2014 (24-months). This report provides an overview on the activities and performance of the Business Cooperation Centres. The document serves two main purposes:

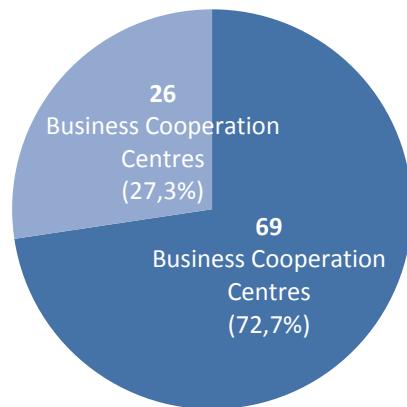

- Business Cooperation Centres should use the statistics contained in the report to benchmark their performance and to compare themselves to other partners operating under Article 21.5 of the CIP.
- For European partners, the document provides an overview on the activities of the Network partners in third markets, which might be of particular interest for their local SME clients.

It should be noted that most statistics contained in the report are based on the data provided by the partners. The document should not be used as such for publicity and promotion of the Network. However, certain information may be used for targeted promotion among local clients.

---

**Number of Activities Reports submitted 2013**  
95 Business Cooperation Centres in 23 consortia

■ Reports submitted ■ No reports submitted

In the reporting period 1 January 2013 – 31 December 2013, 95 Business Cooperation Centres were grouped in 23 consortia covering 19 countries. China is currently covered by 5 consortia.

| Country              | Consortium                               | Number of<br>Partners | Region           |

Evaluators of the submitted reports provided feedback and recommendations on consortium as well as partner level for the four core activities of the Business Cooperation Centres, i.e.:

- (Co-)organisation of Brokerage events and/or Company Missions.
- Generation and dissemination of Partnership Proposals (POD).
- Answering questions from EU Partners (on partner searches, market access, etc.).
- Networking (participation in Network events, annual conference, training sessions, etc.).

The following performance indicators reported by the Business Cooperation Centres were taken into account by EASME for the evaluation:

- **PA Commercial / PA Technological / PA Research**

Partnership Agreements are cooperation agreements between two companies (or other typical Network clients) from different countries. PAs remain the main performance indicators as they demonstrate the Network partner's capacity to successfully facilitate business & research cooperation as well as technology transfer.

- **Clients in BE/CM**

Number of companies recruited for brokerage events and/or company missions organised with other Network partners.

- **Client to client meetings**

Number of meetings organised/facilitated for companies recruited for brokerage events/company missions.

- **POD profiles**

Number of partnership proposals from companies encoded in the Network's Partnership Opportunities Database (POD), i.e. business offers/requests, technology offers/requests or research partnership proposals.

- **EoI received**

Number of expressions of interest received from companies in other countries for partnership proposals encoded in the POD.

- **EoI made**

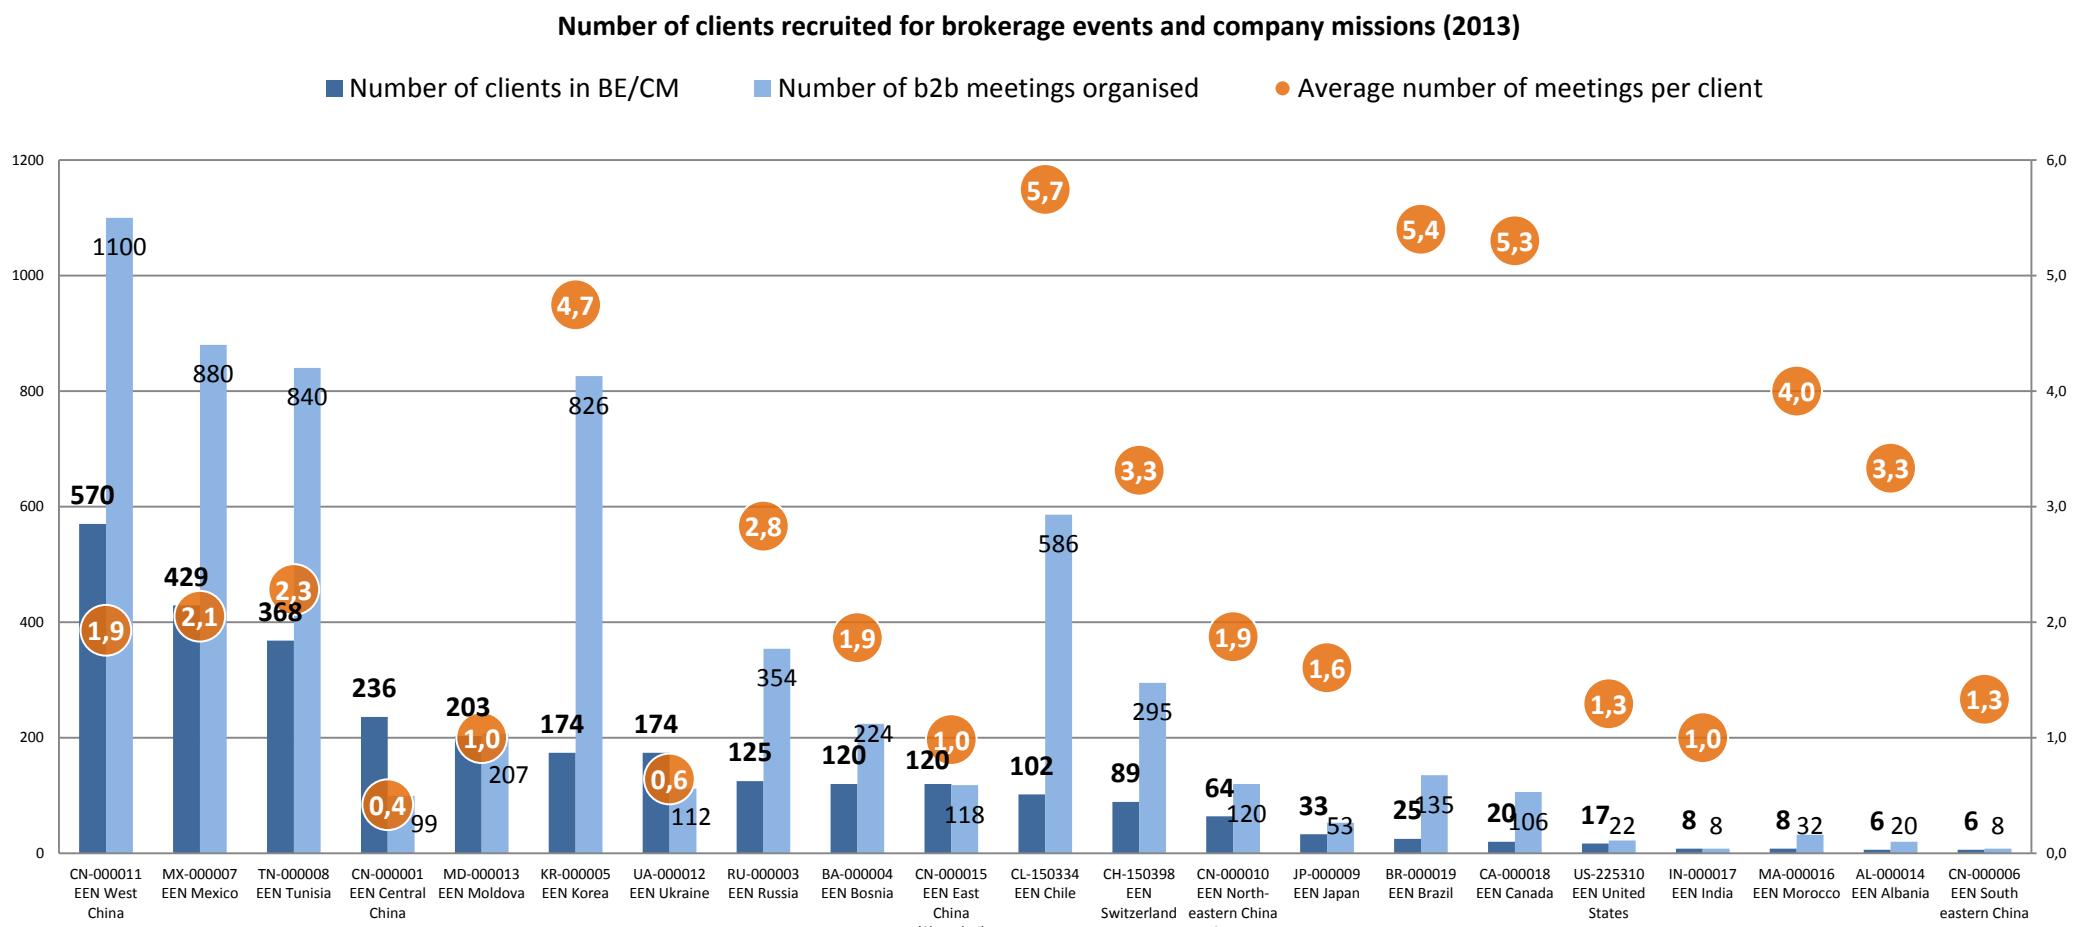

Number of expressions of interest made for partnership proposals from companies in other countries.

- **Network queries answered**

Number of questions answered for other Network partners on partner searches, market access matters, regulatory issues or standards.

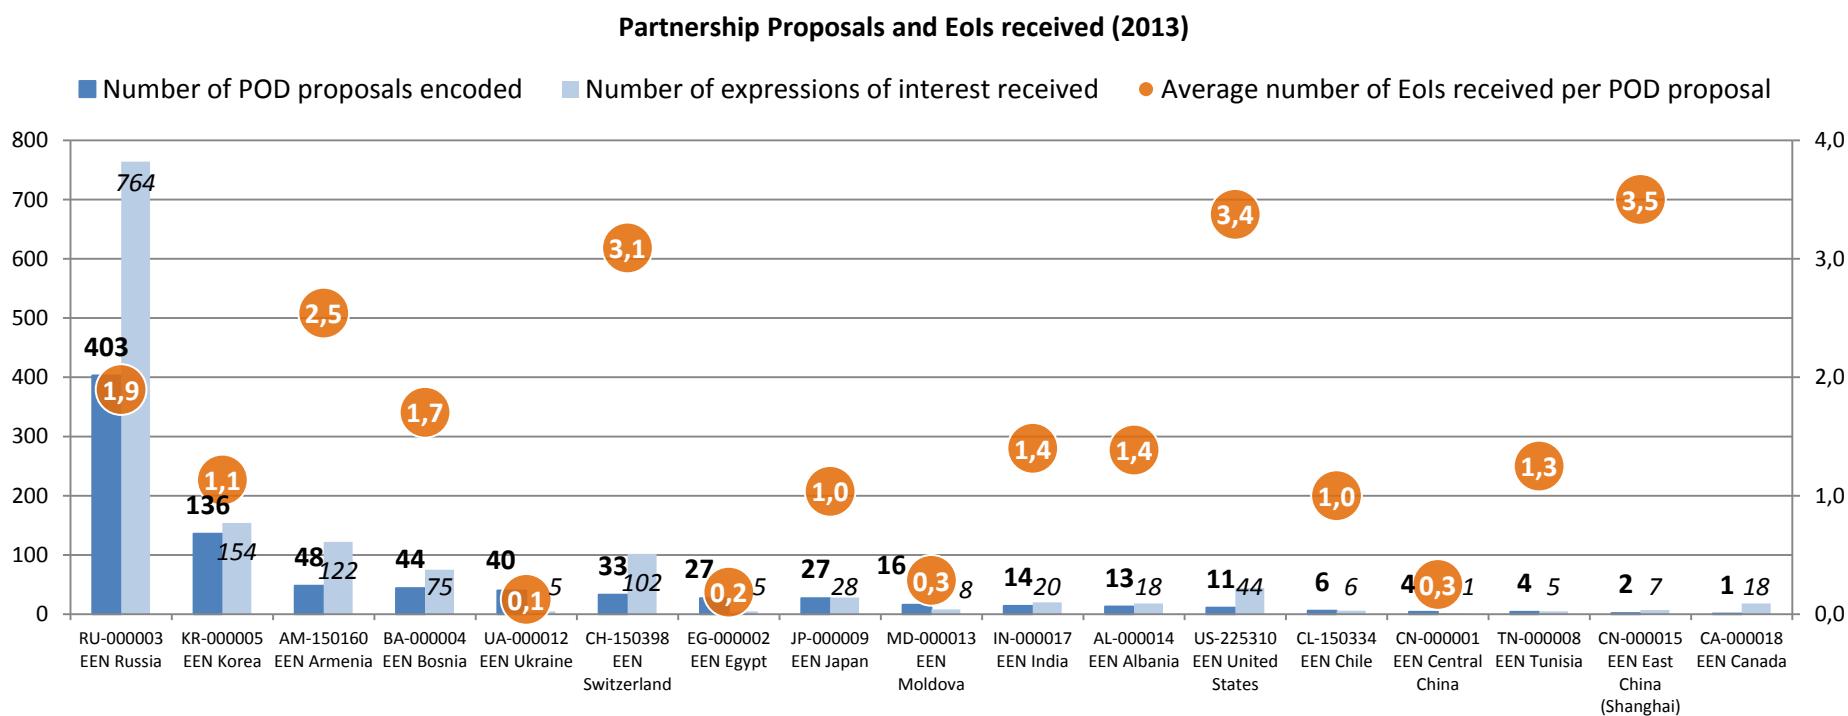

## OVERALL PERFORMANCE

### Organisation of brokerage events & company missions

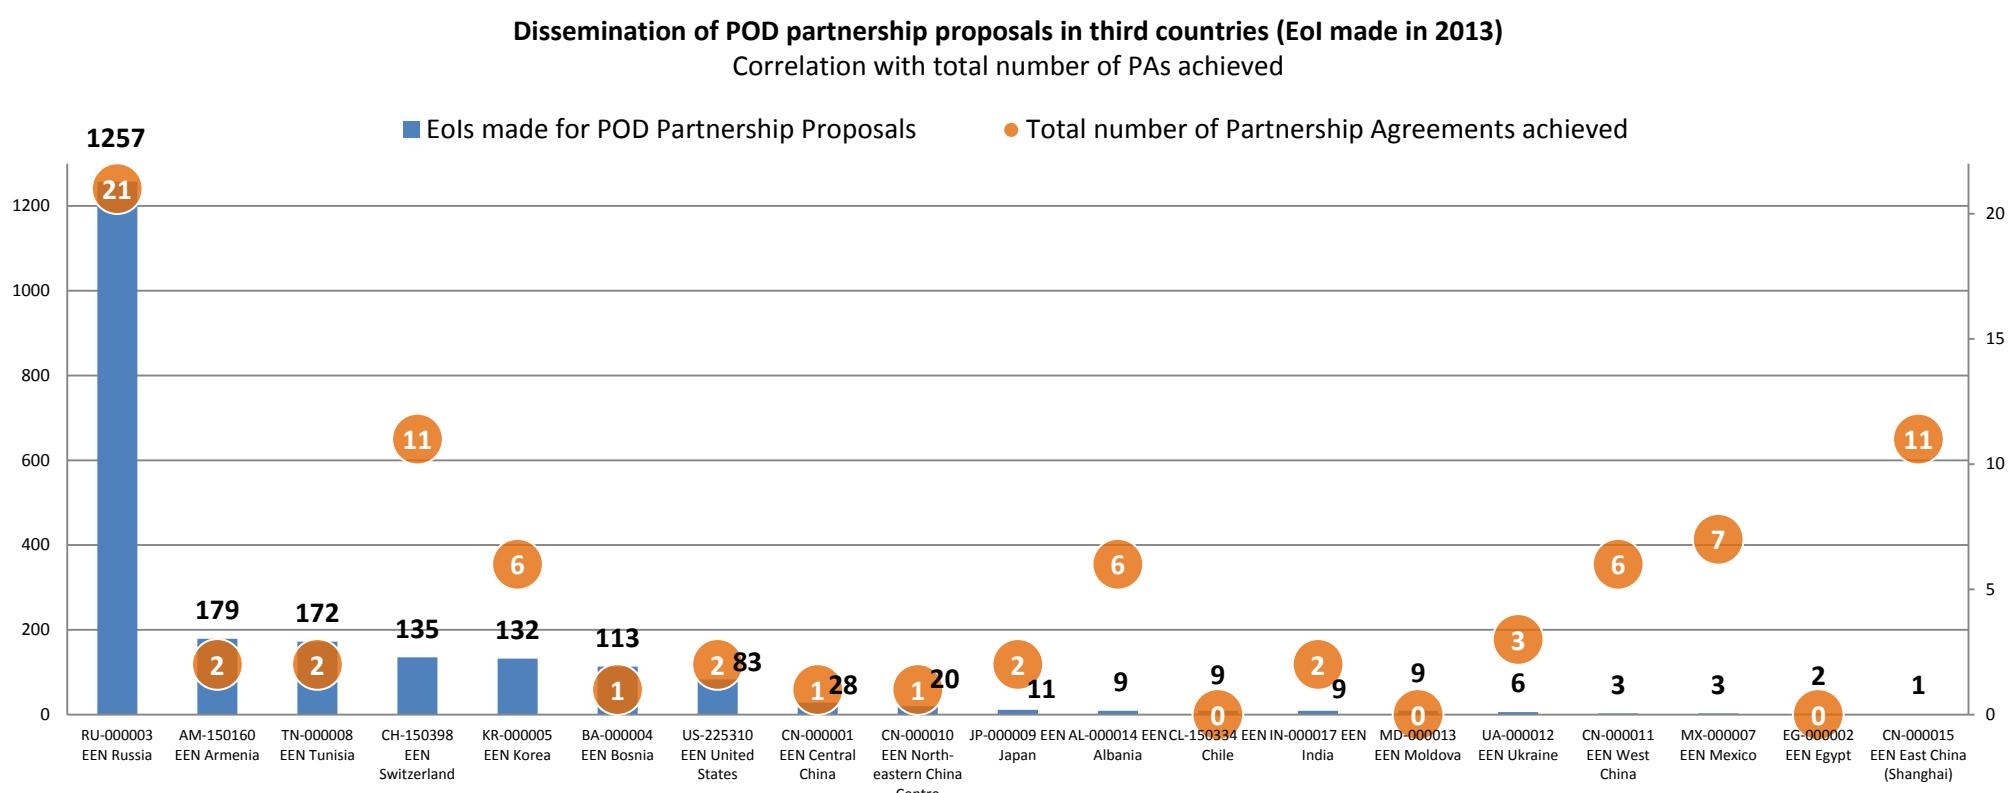

The chart above compares the number of clients recruited for brokerage events and company missions organised in the framework of the Enterprise Europe Network with the number of transnational b2b meetings facilitated. The figure in the orange bubble indicates the average number of meetings organised for each client recruited for brokerage events/company missions. There are several Business Cooperation Centres which regularly organise large-scale brokerage events with European Network partners. For example, EEN West China hosts the annual Chengdu EU-China Business & Technology fair attracting dozens European SMEs and Network partners. Equally, EEN Tunisia organises a large brokerage event every second year on the occasion of the CAT Business and Technology Convention. The majority of the Business Cooperation Centres facilitate on average between 1-2 meetings per client recruited for brokerage events/company missions. EEN Korea, Chile, Brazil and the US facilitate even around 5 meetings on average per client recruited.

## Generation and dissemination of POD partnership proposals

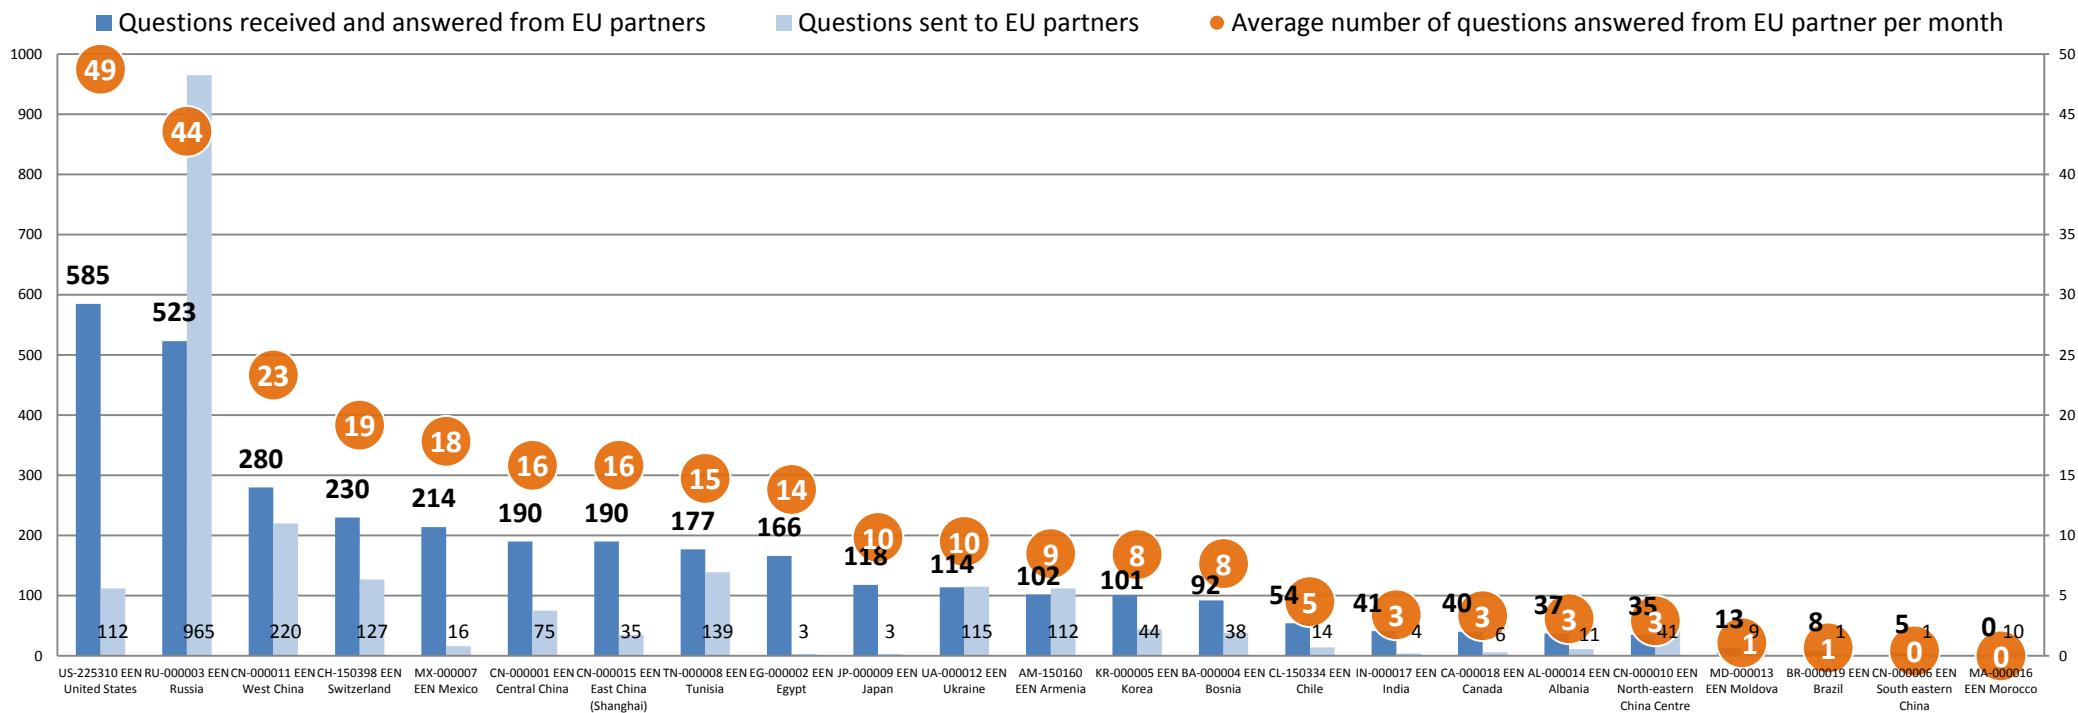

The chart above compares the number of partnership proposals encoded with the number of expressions of interest received from EU partners on behalf of their clients. The number in the orange bubble indicates the average number of expressions of interest received per partnership proposal encoded. It usually takes a certain time until partners have built up the necessary technical capacity to encode good quality profiles. With exception of EEN Ukraine, Egypt, Moldova and Central China, most Business Cooperation Centres receive on average at least 1 or more expressions of interest per partnership proposal.

An important task of the Business Cooperation Centres remains the dissemination of partnership proposals from European companies in third countries. The chart above shows the number of expressions of interest made by Business Cooperation Centres on behalf of their clients. The number of EoI made is put in correlation with the number of Partnership Agreements achieved.

## Answering questions from European Network partners

**Number of questions sent and answered (2013)**  
e.g. on standards, regulations, customs issues, partner search, etc.

The chart above implies a vivid and regular exchange of information between European Network partners and Business Cooperation Centres. For example, EEN Russia and United States answer on average nearly 50 questions per month from EU partners and SMEs on standards, regulations, customs issues and/or partner searches. EEN Brazil has not been in the Network for long enough in 2013 to provide a meaningful indicator.

---

**Total number of questions (2013)**  
e.g. on standards, regulations, customs issues, partner search, etc.

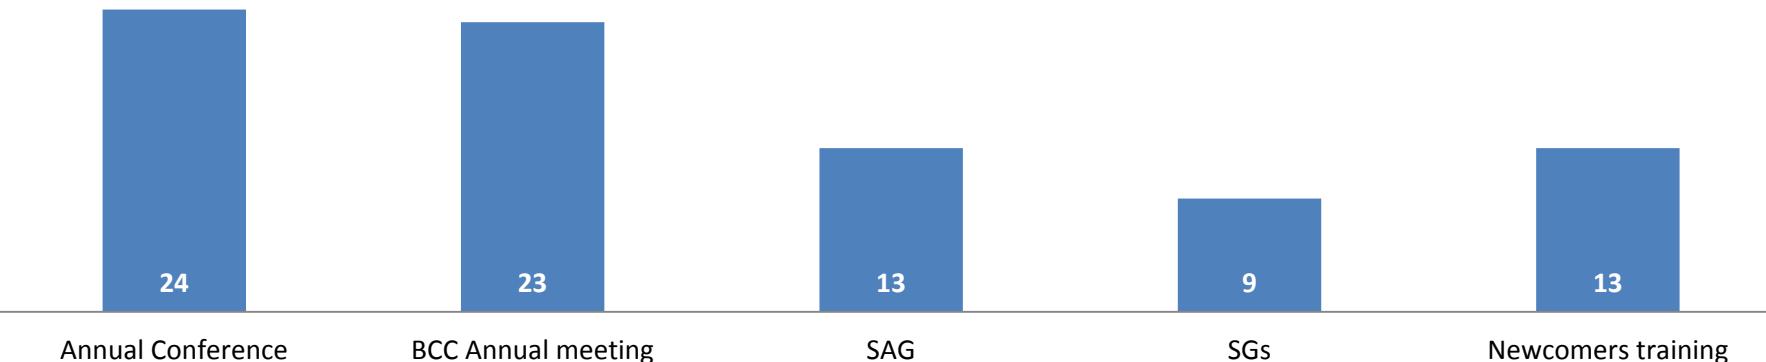

## Networking

The Project coordinators of the 23 consortia participated either in the Annual Conference in Lithuania and/or the yearly Business Cooperation Centre meeting in Brussels. In 2013, 13 representatives of Business Cooperation Centres took part in the 3 SAG meetings. Some of the Business Cooperation Centres are also members of Sector Groups. In total, 13 staff members of Business Cooperation Centres signed up for Newcomers training sessions in Brussels.

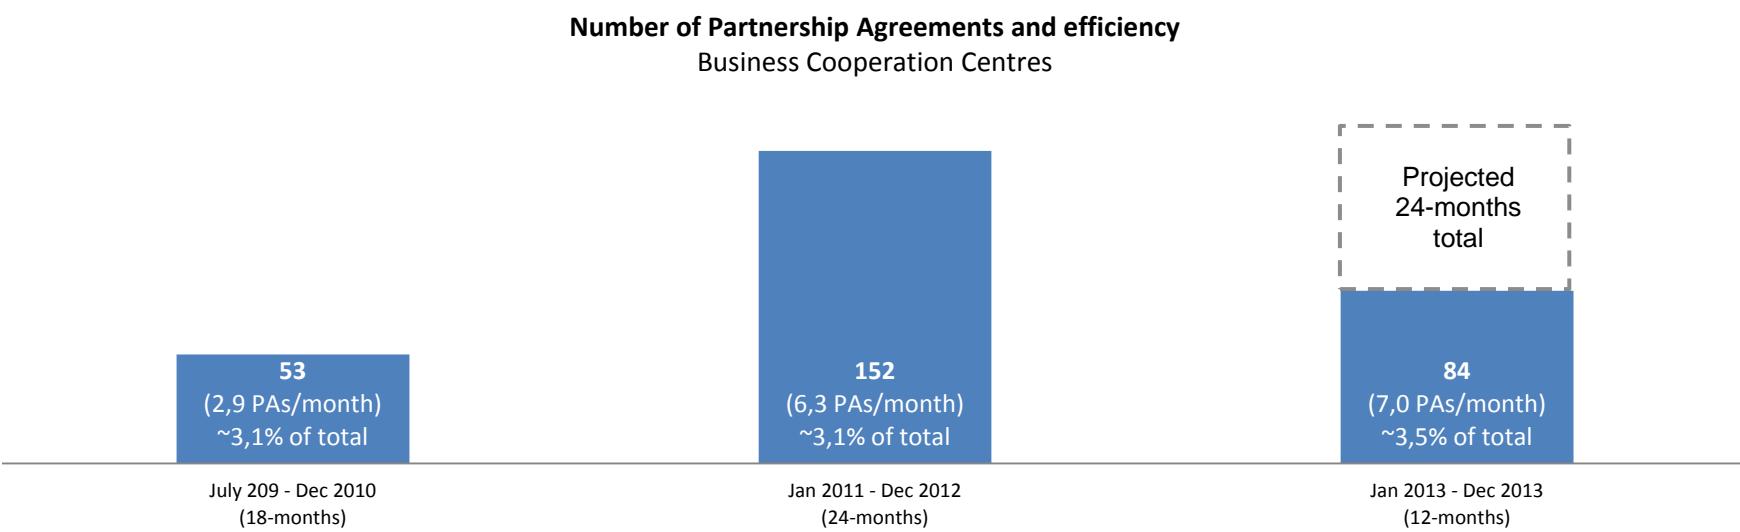

**Networking activities (2013)**

Number of Business Cooperation Centres participating in Network events

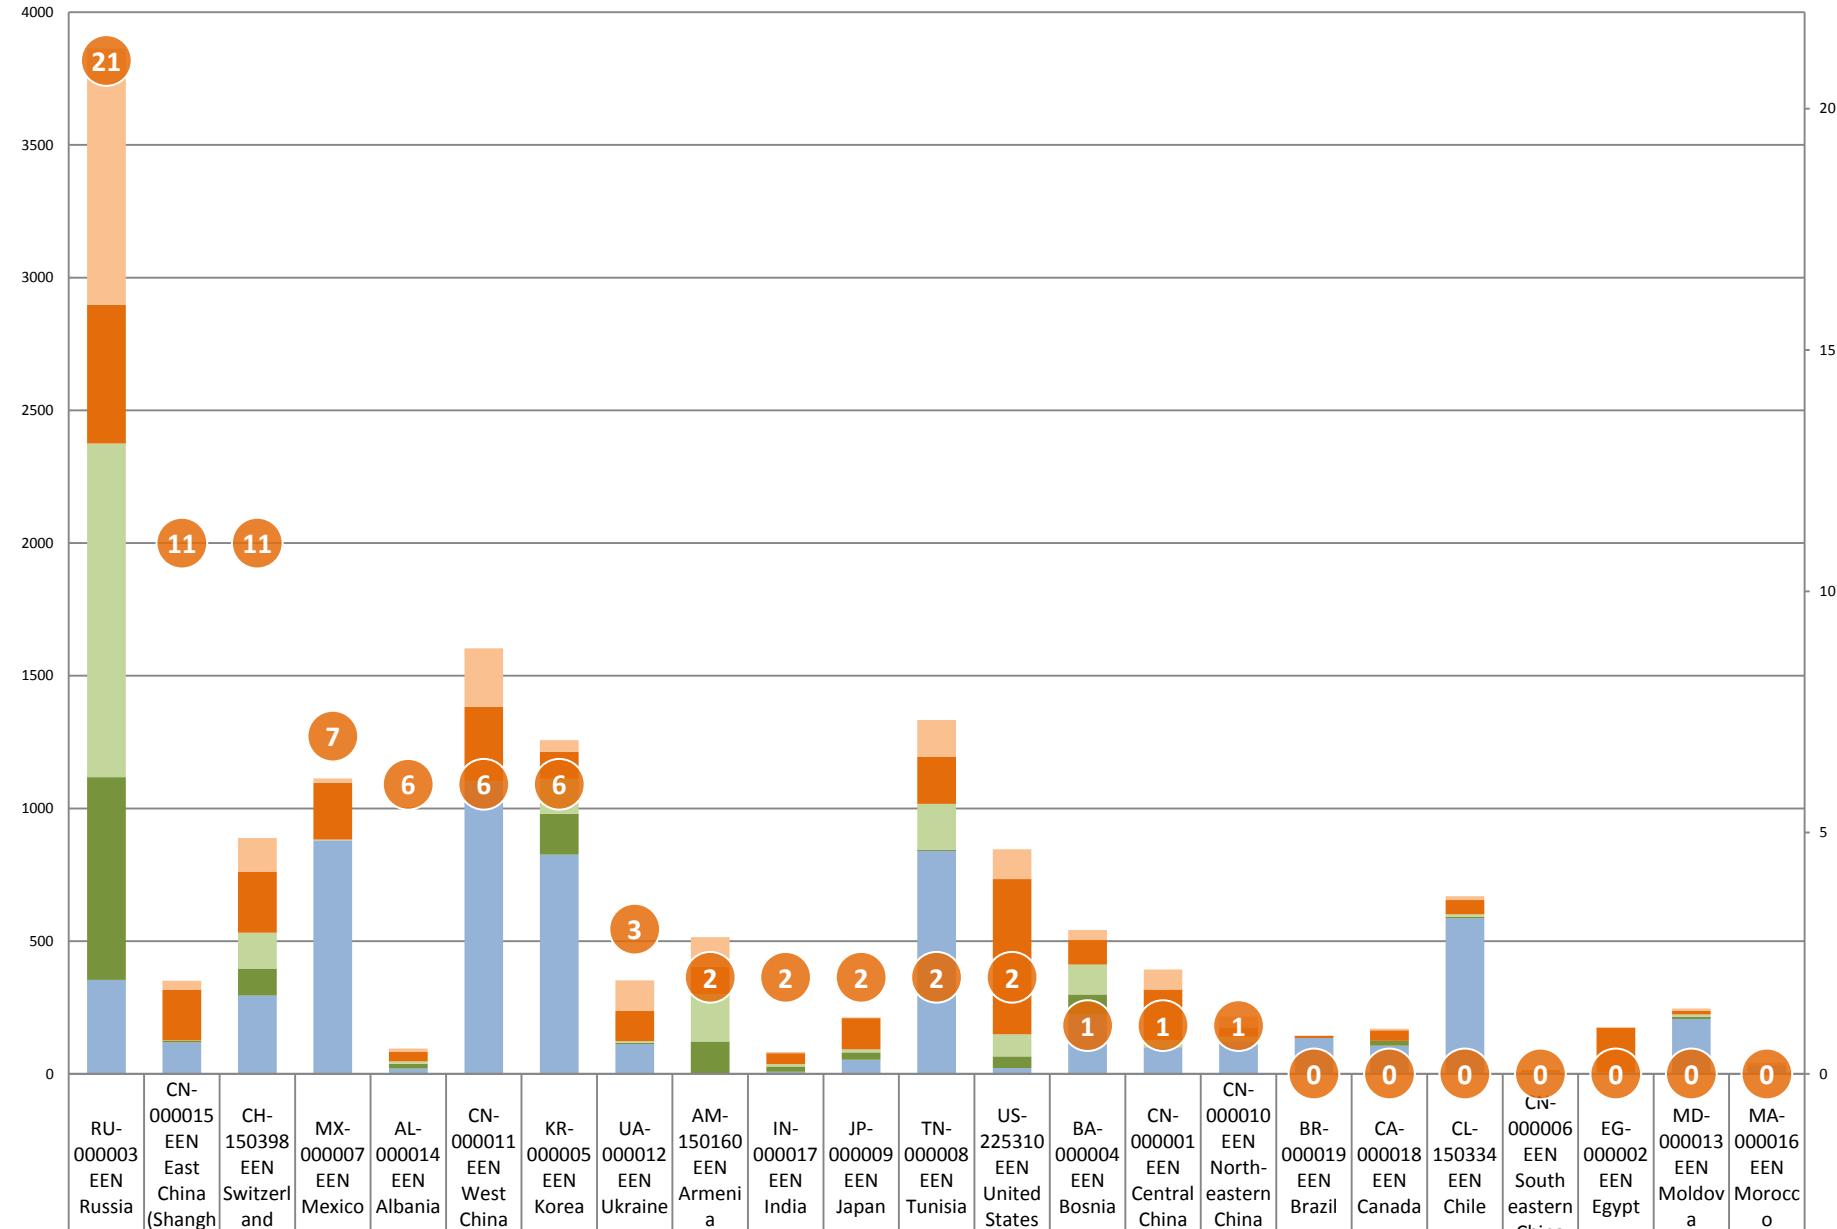

## CONCLUSIONS

Over the past years, the Network's Business Cooperation Centres have been contributing to the achievement of an increasing number of Partnership Agreements. In the previous contractual cycle (Jan 2011 – Dec 2012), the Network facilitated 152 PAs with support of the Business Cooperation Centres, i.e. ~3,1% of the total number of Partnership Agreements. In the on-going contractual cycle this share has increased to ~3,5%. The centres' efficiency in achieving PAs has also increased. Currently Business Cooperation Centres contribute on average to the achievement of 7 Partnership Agreements per month. The majority of Partnership Agreements are facilitated with companies in BRIC states (42 PAs), followed by neighbourhood (23 PAs) and Asian (8 PAs) countries. Only 2 PAs were facilitated with SMEs situated in Maghreb-Mashrek countries.
